

Today's stock market beast is not the same animal it was a decade ago.

In fact, the pace of change has been relentless in recent years, and even the most conscientious individual investor has had a tough time keeping up with the all of the financial market upheaval.

If you're managing your own money, are you getting the results you think you should?

Or, is your money being managed by a stockbroker or investment advisor who insists you "buy and hold" stocks even while Wall Street—and your portfolio—get savaged by a malicious bear?

Now more than ever, individual investors need expert guidance and continuous "eyes on" monitoring of all of their positions, not just occasionally, but every trading day. The simple fact is that in today's market environment, you've got to have an experienced ally on your team if you want to successfully navigate these treacherous market seas.

At Fabian Wealth Strategies, we believe that innovation is at the forefront of each client's success. We break the mold of traditional asset management firms in two very distinct ways.

The first is in the investment philosophy we follow. We believe risk must be managed carefully, and that large losses are unacceptable. Furthermore, we believe that as the investment world changes, investors must adapt accordingly to stay ahead.

Our second mold-breaking feature is our near-exclusive use of cost-efficient investment vehicles. Exchange-traded funds (ETFs) make up the majority of our investment positions. Why? Well, because ETFs offer transparent, liquid and diverse exposure to virtually every sector of both the stock and bond markets.

A sound, adaptable and proven philosophy combined with innovative, low-cost investment tools is the Fabian Wealth Strategies advantage.

WEALTH STRATEGIES

## A Fee-only Asset Manager Specializing in Exchange-traded Funds

Fabian Wealth Strategies created a money management company based on five key promises that deliver big advantages to investors. We provide active asset management which focuses on our most precious asset—the client. All investments, along with all fees, are fully transparent and clear to you.

Our primary purpose is to help you attain your growth and income goals.

### Promises Delivered – 5 Big Advantages for Today’s Investors

Promise	Advantage
1   Active Management	We establish a clear <i>sell discipline</i> on every holding, and then <i>actively monitor</i> each holding every day.
2   Transparent Investment Vehicles	<i>Greater clarity and diversification</i> through the use of exchange-traded funds (ETFs) keep fees low and offer numerous investment options.
3   True Alignment with Client Interests	<i>Greater trust.</i> We receive NO rewards, incentives or compensation tied to ANY one investment.
4   Pay As You Go	<i>Service at a higher level.</i> Our fees are paid monthly with an “earn-as-we-go” attitude, and not paid several months in advance like many advisors.
5   No Penalty To Exit	<i>Lower barriers to exit.</i> We never charge so-called “exit fees” such as redemption fees or surrender fees.

**Take a closer look.** Fabian Wealth Strategies is now accepting new, qualified\* investors seeking either growth, income or both in their portfolios.
